WITH GUEST SPEAKER **DR. BARRY COLLER**

**SATURDAY, SEPTEMBER 16, 2017**

8:15 pm Havdallah

8:30 pm Speaker

9:30 pm Refreshments

10:00 pm Selichot Service

**B'NAI TORAH • 5700 MAIN STREET, TRUMBULL**

Dr. Barry S. Collier received his BA degree from Columbia College and his MD from New York University School of Medicine. He completed his residency in internal medicine at Bellevue Hospital in New York City and advanced training in hematology and clinical pathology at the National Institutes of Health. He served as the Head of the Hematology Division and Clinical Chief of the University Hospital Hematology Laboratory. He was awarded the title of Distinguished Service Professor of Medicine and Pathology at Stony Brook. Dr. Collier served as the Murray M. Rosenberg Professor of Medicine and Chairman of the Samuel Bronfman Department of Medicine at Mount Sinai School of Medicine and he currently serves as Clinical Professor of Medicine at the Icahn School of Medicine at Mount Sinai. He also serves as the founding Director of the Rockefeller University Center for Clinical and Translational Science and the Principal Investigator of the University's Clinical and Translational Science

Award (CTSA). Dr. Collier's research interests have focused on hemostasis and thrombosis, in particular platelet physiology. He developed a monoclonal antibody that inhibits platelet function and a derivative of that antibody was approved for human use by the FDA in 1994, which has wide clinical use to prevent complications of percutaneous coronary interventions such as angioplasty and stent insertion for heart attacks.
